

THERATTRACKER

KEEPING HOME HEALTH THERAPY ON TRACK

What is TheraTracker?

TheraTracker is the most comprehensive home health therapy software on the market today specifically designed for use by individual home health therapists, therapy staffing companies, and home health agencies. TheraTracker was created by home health therapists not only to solve the current problems of home health, but to create an affordable platform to completely manage the business of home health therapy.

The entire home health industry is being mandated to convert to paperless Electronic Health Records (EHR's) or face cuts in Medicare reimbursements. The advantages for going paperless are countless and TheraTracker maximizes those advantages to save you time and money. TheraTracker even out performs many of the current point of care software systems used by home health agencies.

With TheraTracker you will not need specific types of computers or software to download to your server. TheraTracker is a software service based completely online with security features to protect all of your information and keep you HIPAA compliant. You will not find a more versatile, comprehensive, and affordable solution to managing your home health therapy needs.

Why choose TheraTracker?

Therapy Staffing Companies and Home Health Agencies

Are you the owner or administrator of an existing therapy staffing company or home health agency still based on paper or using outdated expensive software? Maybe you are a individual therapist that has always wanted to start your own therapy staffing company but did not know where to turn or was overwhelmed by the financial risk of starting your own company? Turn Key Therapy created TheraTracker with you in mind. TheraTracker was created by home health therapists and based on the business model of a therapy staffing company. TheraTracker is the result of years of learning the in's and out's of home health to provide you with a winning solution. You will not find a more affordable, comprehensive, and easier to use software to manage your home health therapy business. TheraTracker can handle the needs of large and small companies with hundreds of active patients along with your customers, employees, therapists, and physicians.

If you are still working from a paper based system, it's only a matter of time before you, your customers, and your competitors all go paperless. Mobile technology has vastly improved in the past couple of years allowing all healthcare providers the ability to manage all aspects of patient care and business procedures in an instant online. TheraTracker will give you an amazing advantage over your competition. You will be able to instantly see the savings in time and money. Let your clinical staff focus on quality patient care and let TheraTracker take care of the rest.

Why choose TheraTracker?

Independent Contract Therapists

TheraTracker is an all in one therapy management platform that allows you to focus on patient care and not your paperwork or how you are going to get paid. If you work for multiple agencies or staffing companies, TheraTracker can simplify your life and help you maximize your earning potential. You too can own all the tools and features of your very own home health software.

Your employers will be able to send you online patient referrals anytime of the day allowing you to see patients during your open missed visit slots. Your TheraTracker clinical notes have built in custom features that make completing your note easy and quick while still maintaining quality. No more mailing costs or driving to the office to turn in notes, they deliver themselves! With TheraTracker, your employers will be able to view when their patients are going to be seen instead of calling you all the time. Invoicing your customers is simple. You and your employers will love the internal messaging system as it makes communication ultra convenient! TheraTracker is filled with tools designed specifically for you to be as efficient, accurate, and effective as possible so you can spend more time doing the things you really enjoy. Subscriptions to TheraTracker are so affordable that you will never want to use anything else again to manage your home health therapy needs. Independent contractor therapists using TheraTracker are typically able to charge 5-10% more for their services because of the savings and convenience passed on to employers.
